

# ARCHDEBATES

Discussions on Architecture in Archeology . coordinated by Felix Arnold

## III Islamic Landscape Architecture and the Making of the Renaissance Garden

Terracing, the view and the use of water as a design element are found both in Islamic and in Renaissance gardens and villas. Are these similarities the result of crosscultural exchanges? Do they point to commonalities in underlying cultural developments? The 3rd workshop in the series ArchDebates, organized in collaboration with the École Pratique des Hautes Études and the Escuela de Estudios Árabes (CSIC), aims to stimulate transregional, interdisciplinary debates on the history of landscape architecture.

**Thursday March 21, 2024**

**DAIMADRID** Calle Serrano 159, 28002 Madrid
